FROM: Clif Baumer

DATE: August 28, 1992

SUBJECT: EPA Superfund Site on lower Maline Creek between
Bellefontaine Road and Riverview Drive in the Cities
of Bellefontaine Neighbors and Riverview.

On Wednesday, August 26, 1992, I met with Jim McDonald and Donald Sandifer of the EPA and Wayne Miller and others of the Corps of Engineers to discuss options for stabilizing the eroding east streambank at the above referenced location (see attached map).

Pipe and siding containing asbestos is exposed in the eroding creek bank and is present in the channel. A landfill which has been closed is also near the creek bank.

At this time, the EPA is looking for a proposed solution and cost estimate to stabilize the creek bank. I understand that this information will be used in negotiations with the party responsible for clean-up of the site.

The Corps of Engineers will develop this information for the EPA. They evidently have some Superfund money available for this purpose.

Both the Corps and the EPA agreed to keep MSD informed of any further developments.
